INDEX TO VOLUME IV.

JANUARY TO JUNE,

1901.

ABYSSINIA as a market for British Textiles, 281
Acetylene, 281
Admiralty Contracts, Economic Aspects of, 195
Africa, *see* **South Africa**
Agriculture, Protection for, (Ed.), 304
Algoma Central Railway, 486
Allen, C. E., Midland Railway Enterprise; New Line from New Mills to Heaton Mersey, 212
Railway Engineering, 151
Alloys, Anti-Friction, 281
Alternator, 1,000 K. W. Ferranti Engine and, 363
Amazon river, New German Steamship Line to, 484
America(n), *see* California, Chicago, Inter-oceanic Communication, Mexico, New York, Niagara, Panama Canal, Rye, Tin Plates, United States, Vermont, *&c., &c.*
Electrical Production of White Lead, Invention for, 593
Locomotives, Sizes of, 486
Machinery, Superiority of British as compared with, 483
Methods, Improvements on, 200
Motor Cars for London, (Ed.), 512
"Slimness," (Ed.), 408
South, *see* Argentine Republic, *and* Brazil
Steel Plates, Defective, (Ed.), 203
Verdict, on Electricians, (L.), 302
Amos, E. C., Modern Workshop Practice, 131
Anomalous Condition, An, (Ed.), 203
Anti-Friction Alloys, 281
Appointment, 487
Argentine Republic, Harbour-works in progress at Rosario, 484
Armoured Concrete Construction, (Ed.), 618
Asbestos, The *Excelsior* Compound Boiler and Pipe Covering, 679
Assistant Cylinder, Joy's, (for Marine Engines), 681
Atherton, W. H., Methods of Estimating the Powers of Ships, 417
Attempts to Increase the Efficiency of Marine Boilers, (*paper by G. W. Brown*), (L.), 402
Australia;—
Railway Bridge in Queensland, 389
Automatic Lift Brake, A New, 373
Patent Apparatus, (Dodd's), for Controlling Storm Waters, Compensation Waters, and Flow of Sewage, &c., 469
Transmission, The, of Material, A. J. S. B. Little, 621
Wrapping Machinery, The "Forgrove" Patent, 577

BARGE LIFT, New Patent Hydraulic, (Thomas's), 471
Belgium, Shaft-lining with Concrete in, 486
Belt Arrangement, A., J. R. Kelly, 588
Berlin and Hamburg, Electric Express Train between, 508
Bevel Gear Cutting Machine, A New, 453
Birkenhead Electric Tramways, Dynamos used for, 678
Birmingham, Canal Scheme for, (Ed.), 202
Björling, P. R., Gold-mining Machinery, 243, 664
Blast Furnace Slag used to form Concrete for Shaft-lining, 486
Board of Trade Electric Lighting Regulations, (L.), 503, (Ed.), 620
and the Institution of Electrical Engineers 510
Boats, Electric, (Ed.), 620
Boiler and Pipe Covering, a Highly Effective, 679
Boilers, *see* Water Tube Boilers
Boring Shafts, "Strand," 591
Boult's System of Railway Signalling, (without contact 488
Brake, New Lift Automatic, 373
for Railway Wagons, A New Type of, (Laycock's), 466
Brazil, (*see* Amazon river), A Visit to the Gold-mining Districts of, H. K. Scott, 560
Brew, W., Electrical Fires, 325, 554
Bridges;—
Bridge Building, 280
First Metal Railway Bridge, West Auckland, 579
Glasgow Bridge, Re-building of, 389
New Steel Arch Bridge across Niagara river, 388
New Suspension Bridge, 280
Queensland Railway Bridge, A, 389
British Carrying Trade, *see* British Commerce and Coal, (L.), 615
Commerce with the Pacific and British Carrying Trade, Probable Effect upon, of the opening of the Inter-Oceanic Communication across the American Continent, (L.), 297
Commercial Supremacy, E. D. Phillips, 258
as compared with American Machinery, Superiority of, 483
Defeat, Another, due to Negligence, 199
Empire, the, The Unity of, and Imperial Telegraphic Inter-communication, F. G. McCutcheon, 178
Engineering Firm, A Prosperous, Galloways Ltd., 483
Patent Law(s), (Once More our Patent Laws), (Ed.), 409
Reform of, 511
Shipbuilding, A Record in, (Ed.), 618
Steel Industry, The Effect upon, of the United States Steel Corporation, (L.), 399
Trade, Is it Declining? 4
Works, The Arrival of Electric Power in, 484
Bristol Port, The Revival of, (Ed.), 304
Brough, B. H., A Century of Iron and Steel, 42
Brown, G. M., *see* Marine Boilers

CABLES, The Standardisation of, (L.), 403
Cabs in Paris, Electric Traction as applied to, H. E. P. Cottrell, 513
California, successful Solar Motor working in, 596
Calorimeter, The McInnes Steam, 465

Canada, (*see* Ontario),
Canadian-American railway, Quebec to Vermont, 486
Trade Returns, 509
Canals;—(*see* Inter-oceanic Communication)
Canal Scheme for Birmingham, 202
Canals in Prussia, 509
New Panama Canal Project, The, 388
Candid Rival, Our, in the Far East, (Ed.), 617
Care of Grindstones, J. R. Kelly, 590
Cast Iron Pipes, Improved Lathe for "Facing" the Flanges of, 683
Railway Bridge, The First, at West Auckland, 579
Celtic, The, ss., Dimensions of, 684
Central London Railway, The, W. N. Twelvetrees, 347, 442

Century, A, of Iron and Steel, B. H. Brough, 42
of Science, Engineering, Manufacturing and Trade, Introduction, 9
Chains, *see* Cycle Chains
Chicago, the Customs of Workshop Organi ation in, 201
Civil Engineering, 280, 388, 484, 592
Projects in Formosa, 389
Coal, British, (L.), 615
Commercial Intelligence Bureau, A Successful, 282
Prospects in South Africa, (L.), 612
Committee on Water-Tube Boilers, The, 506
Competition, Evils of Indiscriminate, (L.), 501
Concrete, Armoured, (Ed.), 618
from Blast Furnace Slag, 486
Constant Spring Waterworks, (Jamaica), W. R. Sanguinetti, 428
Consular System of America, its Advantages, (Ed.), 408
Continental use of Armoured Concrete, (Ed.), 618
Cooper's Hill, Recent Changes at, (Ed.), 306
Copper and Lead Mines, being developed in Tuscany, (Ed.), 201
Re-opening of some early Roman, in Tuscany, 265
Cotton-Trade Problem, A, (Ed.), 204
Cottrell, H. E. P., Electric Traction applied to Cabs in Paris, 513
Coupled Motors, Applications of Holmes-Clatworthy Patented System of, to Newspaper Printing Machines, 575
Cuthbertson, L. M. G., The Development of the White Lead Industry, 311
Cutting a Worm Wheel, G. R. Martin, 479
Cycle Chains, The Making of, W. H. Wilson, 384
Cylinder Tool, A Handy, F. Cusack 589

Defective American Steel Plates, (Ed.), 203
Destructors, *see* Town Refuse Problem
de Tunzelmann, *see* Tunzelmann, G. W. de
Development, The, of Electrical Engineering, G. W. de Tunzelmann, 86
of the Ferranti Rectifier, W. E. Warrilow, 639
of Mechanical Engineering, W. A. Twelvetrees, 15
of the Textile Industry and Machinery, during the last Century, W. H. Wilson, 57
of the White Lead Industry, L. M. Cuthbertson, 311
Docks in Progress at Naples, Steam-tugs needed at, 484
Dr. Jekyll and Mr. Hyde in the Editor's Chair, (L.), 505
Dod, Major A. H. Wolley-, Appointment of, to post at Hadfield's Steel Foundry, 487
Dodd's Patent Automatic Apparatus for Controlling Storm Water, Compensation Waters, Flow of Sewage, &c., 469
Double-Throw Crank Turning, J. Green, 382
Drainage Construction, (*Jansen's paper*), 592
Works at St. Petersburg, 389
Drilling Machine, New Radial, 679
a Square Hole, Jobic, 382
Dyeing Yarns, Hallensleben's Invention for, 511, 580
Dynamos, Enclosed High-speed Steam, used for Birkenhead Electric Tramways, 678

Earnings of the Record Liners of the North German Lloyd, (Ed.), 410
Economic Aspects of Admiralty Contracts, (L.), 195
Editorial Opinions, 201, 304, 408, 507, 617
Efficiency of Marine Boilers, Attempts to Increase the, (*paper by G. M. Brown*,), (L.), 402
Electric(al) Appliances, (*see* Ferranti Rectifier),
Boats, (Ed.), 620
Driving of Textile Factories, E. K. Scott, 335
"Electrical Review," on the Kennedy Conduit, (L.), 505
Engineering, 280, 390, 485, 592
The Development of, G. W. de Tunzelmann, 86
Engineers' Institution of, The Board of Trade and the, 510
Engines, 1,000, K. W. Ferranti Engine and Alternator, 363
Express Train, An, between Berlin and Hamburg, 508
Fans, 390
Fires, W. Brew, 325, 554
Light, Tesla's, 593
Lighting Regulations of the Board of Trade, (L.), 503, (Ed.), 620
Steam Turbines for, 364

Electric(al) Appliances—*continued*
Power, The Arrival of in British Works, 484
for driving Printing Machines at various speeds, (Holmes-Clatworthy system of coupled Motors), 575
Production of White Lead, 593
Signalling without Contact, Boult's System, for Railways, 458
Supply Mains, Standardisation of, 197
Traction as applied to Cabs in Paris, H. E. P. Cottrell, 513
Conduit, The Kennedy, (L.), 406
Engine, 800 I.H.P., 272
Traction and Electrolysis, (L.), 611
Tramways at Birkenhead, Dynamos used for, 678
Vibration, Marvels of, (Tesla's Experiments), (L.), 303
Electricians, relative greatness of their achievements, (An American Verdict.), (L.), 302
Electrolysis, Electric Traction and, (L.), 611
Enamelled Hollow-Ware Trade, *see* Tin
Energy of a Rotating Body, 468
Engineering Education, (Cooper's Hill.), (Ed.), 306
The President of the Institution of Mechanical Engineers on, (Ed.), 619
Firm, A Prosperous (British), Galloways Ltd., 483
Engines, *see* Electrical Engines, Gas Engines, Locomotives, Oil Engines, Steam Engines, *&c.*
Errata, 487
Evils, The, of Indiscriminate Competition, 501
Excelsior Asbestos Boiler and Pipe Covering, 679
Exhibitions, *see* Glasgow Exhibition

"Facing" the Flanges of Cast-Iron Pipes, An Improved Lathe for, 683
Fans, Electrical, 390
Far East, The, Our Candid Rival in, (Ed.), 617
Fasilka, The, The Repair of the Shaft of, 376
Fires, Electrical, W. Brew, 325, 554
Feilden, Th., The Twentieth Century, 1
Ferranti Rectifier, The, The Development of, W. E. Warrilow, 639
Fiction, Machinery in, Ethel Wheeler, 185
Fires, Electrical, W. Brew, 325, 554
Fisheries, *see* "French Shore" Question
Flanges of Cast Iron Pipes, An Improved Lathe for "Facing", 683
"Forgrove" Patent Automatic Wrapping Machinery, The, 577
Formosa, Civil Engineering Projects in, 389
France, *see* Indo-China *and* Paris
"French Shore" Question, (Newfoundland), Industrial Aspects of the, (L.), 607
From Birmingham to the Sea, (Ed.), 202

Galloways Ltd., A Prosperous (British) Engineering Firm, 483
Gas, *see* Acetylene
Gas Engine, The, (*see also* Oil Engines), J. Hall, 377, 473
Geipel, Mr., *see* Electric Power in British Works
German Flag, The, The Hoisting of, (Ed.), 203
Improvement in High Tension Distribution, (Müller's), 485
Steamship Line from Hamburg to the Amazon, 484
Germany, (*see also* Prussia)
Electric Express Train in, between Berlin and Hamburg, 508
Germany's Naval Ambition, (Ed.), 308
Glaser, G., Physical Science in the 19th Century, 69
Glasgow Bridge, Rebuilding of, 389
International Exhibition, The, 531
Gold-Mining Districts of Brazil, A Visit to the, H. K. Scott, 560
Machinery, P. R. Björling, 243, 664
Great Britain, *see* British Candid Rival, London, West Auckland *&c.*
Lakes and Hudson Bay Railroad, 486
Grindstones, The Care of, J. R. Kelly, 590

Hall, J., The Gas Engine, 377, 471
Hallensleben, Mr. Otto, Invention of, for Dyeing Yarns, 511, 580
Halliday, G., Marine Engineering and Shipbuilding, 107
Hammers, *see* Power Hammers
Handy Cylinder Tool, A, F. Cusack, 589
Shaping Attachment, A, J. Green, 276
Vice Clamp, A, J. C. Truman, 482

Harbour Works, (*see* Docks), at Rosario in the Argentine Republic, 484
at Touram, Indo-China, 390
Hardening of Milling Cutters, 595
High Tension Distribution, Improvement in, Müller's, 485
Highly-Effective Boiler and Pipe Covering, A, 679
Hoisting of the German Flag, The, (Ed.), 203
Holmes-Clatworthy Patented System of Coupled Motors, Applications of, to Newspaper Printing Machines, 575
Howden's Oil Burner, 369
Hudson Bay, Railroad to, from the Great Lakes, 486
Hydraulic Barge Lift, New Patent, Thomas's, 477

Imperial Telegraphic Inter-Communication, The Unity of the British Empire and, F. G. McCutcheon, 178
Improved Form, An, of Transit Theodolite, 370
Motor Controlling Switch, 270
Railway Couplings, (Ed.), 306
Roving Frame, An, 573
Improvement in High Tension Distribution of Electricity, Müller's, 485
Improvements on American Methods, 200
Indiscriminate Competition, The Evils of, 501
Indo-China ;—
Touram, Harbour Works at, 390
Industrial Progress, 280, 388, 483, 592, 694
Aspects of the "French Shore" Question, (L.), 607
Institute of Marine Engineers, The, (Ed.), 305
Institution of Electrical Engineers, The Board of Trade and the, 510
Mechanical Engineers, The President of, on Engineering Education, (Ed.), 619
Inter-Oceanic Communication across the American Continent, Probable Effect of, on British Commerce with the Pacific and British Carrying Trade, (L.), 297
Introductory, 9
Iron, Molecular Change of, under Magnetic Stress, 592
in Newfoundland, *see* "French Shore" Question
and Steel, A Century of, B. H. Brough, 42.
Is British Trade Declining? 4
Italy, *see* Naples *and* Tuscany

Lucerne, Hallensleben's Dyeing Works at, 511

Machine Forging, F. E. Thomas, 480
Machinery Appliances and Processes, 265, 363, 453, 573, 674
Classes of, required in Mexico, 484
in Fiction, Ethel Wheeler, 185
McInnes Calorimeter, The, 465
Magnetic Stress, Molecular Change of Iron under, 592
Making, The, of Cycle Chains, W. H. Wilson, 384
Manufacture, The, of Metallic Tubes and Bars, 595
Marine Boilers, Attempts to increase the Efficiency of (*paper by G. M. Brown*), (L.), 402
Marine Engineering, and Shipbuilding (*see* Admiralty, *Celtic*, Turbines, *&c.*, *&c.*), 484
Article on, G. Halliday, 107
Engineers, The Institute of, (Ed.), 305
Engines, Joy's Assistant Cylinder for, 681
Torch, A New, 271
Marvels of Electrical Vibration, (L.), 303
Material, The Automatic Transmission of, A. J. S. B. Little, 621
Maw, W. H., on Engineering Education, (Ed.), 619
Maxwell, W. H., The Town Refuse Problem and its relation to Steam-Production, 433, 648
Mechanical Engineering, 483, 594
Metallic Tubes and Bars, The Manufacture of, (*Nursey's paper*), 595
Methods of Estimating the Power of Ships, W. H. Atherton, 417
Mexico, Classes of Machinery required in, 484
Preference for British rather than American Machinery in, 483
Midland Railway Enterprise. New Line from New Mills to Heaton Mersey, C. E. Allen, 212
Mikasa, Japanese Battleship, 7
Milling Cutters, The Hardening of, 595
Machine, No. 12, Universal, 574
Mineralogy, *see* Copper and Lead
Mining Engineering, (*see* Gold-mining, *and* Gold-mining Machinery), 486
Modern Workshop Practice, E. C. Amos, 131
Molecular Change of Iron under Magnetic Stress, 592
Motor, A successful Solar, 596
Cars, American for London, (Ed.), 512
Controlling Switch, An Improved, 270
Mottling Tin Plates, Novel Method of, 594
Moulding Material, A New, 595.

Naples, Steam-Tugs wanted for the Docks at, 484
Naval Ambition of Germany, (Ed.), 308
Engineering, *see* Admiralty, Torpedo Boats, Turbines, *&c.*
New Lift Automatic Brake, 373
Panama Canal Project, The, 388
Radial Drilling Machine, 679
Railroad from Quebec to Vermont, 486
Steamship Line, to the Amazon from Germany, 484
New York, Rapid Transit Tunnel at, (Ed.), 307
Newfoundland, Industrial Aspects of the "French Shore" Question, (L.), 607
Newspaper Printing, *see* Holmes-Clatworthy
Niagara River, New Steel Arch Bridge across, 388
North German Lloyd Record Liners, Earnings of the, (Ed.), 410
Number 12., Universal Milling Machine, 574

Octagon Dome Setting out a, 275
Official Report on the Efficiency of a 1,000 kilo-watt Steam-Turbine and Alternator, manufactured by C. A. Parsons & Co, Ltd., 272
Oil Burner, Howden's, 369
Engines, or Gas Engines, A Method of Testing, 279
Once More, our Patent Laws, (Ed.), 409
Ontario Government, Minerals and Lumber of, 486
One Thousand k.w. Ferranti Engine and Alternator, 363
Our Candid Rival in the Far East, (Ed.), 617

Panama Canal, The New Project for the, 388
Patent Laws, British, (Once More, our Patent Laws), (Ed.), 409
Reform of, 511
Phillips, E. D., British Commercial Supremacy, 258
Physical Science in the 19th Century, G. Glaser, 69
Pipe Covering, *see* Boiler and Pipe
Vice, An Improved, C. A. Burton, 588
Pipes. *see* Cast Iron Pipes
Planing a Radius, E. Rollinson, 482
Planté Plates, Important Improvement in, 594
Plea for Kew Observatory, (L.), 198
Pneumatic Signal Apparatus, (Ed.), 202
Power Hammers, E. Samuelson, 233
Transmission Plant, A Noteworthy, 280
Practical Articles for Practical Men, 377, 473
President, The, of the Institution of Mechanical Engineers on Engineering Education, (Ed.), 619
Price for Electrical Units, *see* Board of Trade
Printing Machines, . . . Application of Holmes-Clatworthy System of Coupled Motors to, 575
Probable Effect upon British Commerce with Pacific and British Carrying Trade of the Opening of Inter-Oceanic Communication across the American Continent, (L.), 297
Problems of Science Teaching, (Ed.), 308

Prosperous Engineering Firm, A (British), Galloways Ltd., 483
Protection for Agriculture, (Ed.), 304
Prussia's New Waterways, 509

Quarter-Twist Belt Driving, C. S. B., 480
Quebec to Vermont, New Railroad between, 484
Queen, The Great, Good, (In Memoriam Queen Victoria, Supplement to Feb. Issue), 4 pp.

Radial Drilling Machine, New, 679
Radius, Planing A, E. Rollinson, 482
